### ABOUT US

BearRubber was established in April 2015 by Norman and William Ormiston, two brothers from Mullagh, County Cavan. The company was developed to work with manufacturers in the rubber industry based in Ireland and the UK. We help companies dispose of their rubber waste or manufacturing rubber by-product and therefore save them money. BearRubber also helps to improve the environmental image of companies that we work with, by providing them with an alternative solution to landfilling, therefore reducing their carbon footprint. In return BearRubber can manufacture a high quality end product for many industries at an affordable price. BearRubber has also recently won Best Start-Up Business Award 2015.

### TECHNICAL INFO

BearRubber manufactures 100% steel free rubber products at an affordable price which services the Equine, Leisure, Horticulture, Civil, and Agricultural Industries. We are Experts in Eco-friendly Rubber Products. Our rubber products are produced from manufacturing by-products and not end of life tyres; this gives us clean, durable and steel free products.

### WASTE RUBBER COLLECTION

We offer a waste rubber collection service in Ireland and the UK. We are currently working with a wide range of manufacturers in the rubber industry and other related industries. Our low cost reliable rubber collection service provides significant monetary savings to our customers who provide us with their waste rubber or manufacturing rubber by-product. Savings of up to 50% can be achieved by choosing our collection service over alternative methods of disposing of their rubber waste or manufacturing rubber by-product.
